

ABDULMUJEEB ABIOLA, BAKARE

COMPUTER ENGINEERING STUDENT

Federal University of Technology, Akure | bakareaacpe2022@futa.edu.ng | +234 810 119 2323
www.linkedin.com/in/abdulmujeeb-bakare | www.github.com/strangerlab7

Computer Engineering undergraduate with hands-on experience in IT support, computer networking, hardware troubleshooting, and embedded systems. Experienced in configuring LAN infrastructure, diagnosing hardware and software issues, maintaining network connectivity, and supporting technical operations in high-availability environments. Passionate about reliable IT systems, cybersecurity, and technology that powers critical infrastructure.

TECHNICAL SKILLS

- **IT SUPPORT:** Hardware Troubleshooting, Windows Installation & Configuration, Technical Support, Software Deployment, Printer & Peripheral Configuration, System Maintenance.
- **Networking:** TCP/IP, IPv4 Addressing, LAN/WAN, Cisco Packet Tracer, Router & Switch Configuration, Network Troubleshooting, RJ45 Termination, Structured Cabling, DNS, DHCP
- **Cybersecurity:** Security Fundamentals, Access Control, Identity Management, Endpoint Security, Risk Assessment, Network Security
- **Hardware & Embedded Systems:** ESP32, Arduino, C/C++, Proteus, Multism, MATLAB
- **Productivity:** Microsoft Excel, Microsoft Word, Microsoft PowerPoint, Incident reporting, Technical documentation, Data Analysis

CERTIFICATIONS

- Cisco IT Essentials 8
- CCNA: Introduction to Networks
- Cisco Introduction to Cybersecurity
- Jobberman Soft Skills

PROFESSIONAL EXPERIENCE

Student's Work Experience Program | Project Imole Engineering Ltd

Sep 2025 - Oct 2025

- Assisted in the installation, configuration, and testing of solar power systems and electrical equipment across residential and commercial projects.
- Performed equipment inspections and basic fault diagnosis on inverters, batteries, PV modules, and associated electrical components.
- Collected and documented system performance data to support preventive maintenance and engineering decision-making.
- Collaborated with engineers during site surveys, commissioning, and technical troubleshooting to ensure reliable system performance.

- Installed and maintained LAN infrastructure, performed RJ45 termination, diagnosed workstation failures, and provided technical support during high-volume CBT operations.
- Diagnosed and resolved hardware, software, and network issues under strict uptime requirements, ensuring uninterrupted examination operations.

President NACES, FUTA Chapter**Nov 2025 - June 2026**

- Overseeing the executive council, ensuring task completion accuracy across departmental projects and events.
- Reporting & Documentation: Maintaining official records and drafting formal proposals for the HOD and University management.

PROJECTS

Smart Load Management System

Technologies: Arduino, Relay Module, Current Sensor, Proteus

Skills: Embedded Systems, Power Management, Automation, Circuit Design

- Designed an Arduino-based smart load management system to automate electrical load switching.
- Simulated load control logic to improve energy efficiency and prevent overload conditions.

Enterprise Network Design

Technologies: Cisco Packet Tracer, TCP/IP, IPv4, Routers, Switches

Skills: Network Configuration, IP Addressing, Routing, Network Troubleshooting

- Designed and simulated an enterprise network using Cisco Packet Tracer.
- Configured IP addressing, basic routing, and validated network connectivity through fault isolation.

EDUCATION

B.Eng. Computer Engineering**May 2022 - November 2027(Expected)**

Relevant Coursework

- Computer Networks, Operating Systems, Microprocessors, Embedded Systems, Power Electronics, Electrical Machines, Circuit Theory, Digital Systems, Computer Architecture
